

# The new Trinity Corporate Services website is online: Your company abroad, with focus in Dubai and in the UAE

*Trinity Corporate Services is specialized in the formation and setup of companies in Dubai and in the UAE. They have been doing this job for over 40 years, providing **professional consulting to entrepreneurs, companies and startups** who want to establish their business in the UAE.*

Many companies want to **move their business abroad**, or create a new one in a country with fewer taxes and simpler bureaucracy. In order to do so, they need to have a team of advisors on site, that can help them go through the process smoothly.

The UAE, and Dubai in particular, are offering a lot of interesting opportunities to support **the foundation of new enterprises** and to attract new talents into the country.

Thanks to their cultural openness, their policies on economic matters, their liberalism and will to have a welcoming - yet competitive – country, foreign companies have found a place suitable to set up their business, all this being facilitated by the Government and its policies on international investments.

Dubai is implementing a set of benefits as well as smart strategic support to encourage new companies and professionals from other countries to settle in the UAE.

The UAE have always stood out for being innovative in many fields and for making projects a reality. The impact of Expo2020, which will be held in Dubai, won't stop after the event itself. It will actually go on with new plans, funds and initiatives until and beyond 2070.

Dubai is definitely unmatched in its social, cultural and economic liveliness.

The upcoming Expo2020 has also given way to a unique plan for building and realizing new infrastructures: no other state has known such **strong economic growth** or has implemented so many policies **to help foreign enterprises establish in Dubai**. Not to mention Dubai's welcoming approach to talents in all domains, from business to science and culture.

We can definitely state that doing business in the UAE is easy. In the 2018 World Bank Doing Business report, the UAE moved from 26<sup>th</sup> to 21<sup>st</sup> position. They ranked 47<sup>th</sup> in 2008. These results have positioned them higher than Switzerland, France, Spain, Italy and Japan.

Dubai is for sure one of the best countries where one can start a business setup. In its free zones, setting up a new company is simple and safe, perhaps with the purpose of moving to the mainland afterwards.

Another important advantage is that Dubai is located at a geographic crossroads: it is a connecting point for the Middle East and the rest of Asia, Europe and Africa. Its excellent position makes it a lot easier to do business in these countries, as people can meet halfway between East and West.

The Government's goal is for Dubai to become **an international business hub**.

To summarize, whether one wants to start a new business or transfer there an existing company, there are extremely good chances for success, especially with the assistance of the right consulting team. And again, this is a fact, considering all the facilities currently offered by the UAE.

**Trinity Corporate Services**, located both in Dubai and Zurich, help companies with their internationalization process no matter which country they are from, providing the right assistance to start a business in the UAE. With **Trinity Corporate Services** every company enjoys a tailored operational framework, with their specific needs and requirements being given great consideration.
